

Health and Safety Policy (Eurostyle-Systems Bonyhád Kft.)

Responsibility: The Site Plant manager appoints the HSE Specialist to lead the development of health and safety impacts.

We are committed to providing safe and healthy working conditions that meet the specific nature of the risks faced by employees and others, through continuous improvement and the prevention of work-related injuries and ill-health.

Therefore, in accordance with the main health and safety risks related to our activities, services and products, as well as the risks of interested parties, we are committed to applying an effective health and safety management system at all our sites with the support of our employees and partners.

We focus our efforts on the following measures and objectives:

- We are strongly working on to reduce the frequency of lost-time accidents by continuous development, awareness and safety-focused behavior.
- Establishing an ISO45001-based health and safety management system based on indicators for working conditions and management conditions.
- Carry out risk assessment and keep it up to date in every plant to eliminate hazards and reduce risks.
- Training and warning all of our employees (internal and external) working in the plant about the risks they face and the rules to be followed in order to avoid accidents.
- We have a clear idea of how to promote the recruitment and retention of people in order to sustain EHS culture.
- Use of a regulatory platform for legal compliance with local health and safety requirements.

We undertake to implement a local health and safety policy in each of our plants, in which all directors commit to promoting a favorable health and safety culture with the cooperation of employee representatives, define specific objectives for activities, products and services, and ensure their application in all processes.

We communicate this Health and Safety Policy to everyone on our website and through our internal communication board.

Review: During management reviews, we annually review our responsibility strategy in accordance with health and safety issues.
